

Instructions

- Print this page.

WHEN PRINTING, PLEASE MAKE SURE ALL "SCALE TO FIT PAGE" CHECKBOXES ARE UNCHECKED

- Cut out the ring sizer.
- Cut the small slit marked with an arrow.
- Place ring sizer comfortably around the desired finger by slipping pointed end through the slit. Make sure the numbers are on the outside.
- Pull the pointed end securely around your finger (just like a belt), until it's secure and tight, but you can still move it around. Make sure the sizer is not too loose or too tight.
- The number that appears next to "Your Size" is your approximate ring size.

To convert between size units use the size chart, which can be found on our website:

<https://www.vintageyard.com/ring-size-chart.html>

If the finger is not available for measuring, you can place a ring from the individual's current collection on a circle within the chart below. The inside edge of the ring should fit against the correct circle size.
